

RiskPro for EliteDesigns to be discontinued

As a registered user for the RiskPro for EliteDesigns portfolio construction tool, you are receiving this notification to alert you to an upcoming change regarding this resource.

After evaluating advisor interest, Security Benefit Life Insurance Company (SBL) and First Security Benefit Life Insurance and Annuity Company of New York (FSBL) have decided to discontinue their agreements with ProTools, the provider of the RiskPro tool. SBL and FSBL's agreements made the RiskPro tool available for your use with the EliteDesigns suite of variable annuities.

Effective March 31, 2016, we will no longer offer the RiskPro tool or The Market Movement Solutions® (MMS) Model Portfolios made available for use with the EliteDesigns suite of variable annuities. Registered advisors will continue to have full access to these resources through March 31 at www.sb.riskproadvisor.com.

Discontinuation of the MMS models and the RiskPro tool will not impact or change any existing allocations you may have set within Security Benefit's Group Trading Platform. For continuity purposes, we encourage you to download and save any client portfolios to your records that you have already constructed or plan to build from RiskPro within the next month, and revisit those portfolios within our Group Trading Platform.

We apologize for any inconvenience this may cause. If you have questions, please contact us at 800.747.5164.
