NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

- A. The Company sells fixed index deferred annuity (FIA) contracts which credit interest to the policyholder based on a percentage of the gain in a specified market index. The Company uses a portion of the premium received on these policies to purchase one year and multi-year call options depending on the index crediting option specified by the policyholder. The call options are economic hedges used to fund the index credits to the policyholder. The call options are not considered to be effective hedges for accounting purposes under the NAIC Accounting Practices and Procedures Manual, SSAP No. 86 – Derivatives (SSAP No. 86).

SSAP No. 86 specifies that "Derivative instruments used in hedging transactions that do not meet or no longer meet the criteria of an effective hedge shall be accounted for at fair value and the changes in fair value shall be recorded as unrealized gains or unrealized losses (referred to as fair value accounting)." Although highly effective on an economic basis, the call options used to hedge the index crediting features of the Company's FIA products do not meet the effective hedge criteria for accounting purposes in that the payment timing of the option does not match the payment timing of the liability (i.e., options pay out annually or other interval based on the index term and the payments to policyholders related to the liability may be paid out over a longer term). The options therefore, would be valued at fair value with changes in the fair value recorded as unrealized gains or losses.

The reserving requirement for the aforementioned policies falls under Actuarial Guideline (AG) 35, which provides the manner in which current and future index credits are valued. Changes in the reserve liability are reported through operations.

Kansas statutes permit accounting for one year call options and multi-year call options in a manner that differs from NAIC statutory accounting practices and procedures. This differing accounting practice is conditioned on the hedging program referenced above being economically effective and allows the Company to report call options at amortized cost. It also allows the reserve calculation to assume the fair value of the call options associated with the current index crediting term is zero and index interest credited to FIA contracts is reflected when realized.

The impact of the prescribed practice discussed above, including the impact of income taxes, was to increase 2023 statutory income by \$228,785,900 and to increase statutory surplus by \$189,048,763.

- B. The preparation of financial statements in conformity with the NAIC Annual Statement Instructions and the Accounting Practices and Procedures Manual requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. It also requires disclosure of contingent assets and liabilities at the date of the financial statement. Actual results could differ from those estimates.
- C. Accounting Policy
- Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations are recognized as revenue when received. Health premiums are earned ratably over the terms of the related insurance contracts. Considerations for deposit-type contracts are not recognized as revenues but are recorded directly to the appropriate policy reserve liability as required under the Statement of Statutory Accounting Principles (SSAP) No. 52, *Deposit Type Contracts*. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Several accounting policies are as follows:
- (1) Short term investments are stated at amortized cost.
 - (2) Bonds not backed by loans are valued at amortized cost using the interest rate method, except where mandatory prepayments are required or where an earlier call date creates a lower yield. Bonds with a NAIC designation of 6 are stated at the lower of amortized cost or fair value.
 - (3) Unaffiliated common stocks are valued at fair value.
 - (4) Redeemable preferred stocks with NAIC designations 1 to 3 shall be valued at amortized cost. All other redeemable preferred stocks (NAIC designations 4 to 6) shall be reported at the lower of amortized cost or fair value. All perpetual preferred stocks shall be valued at fair value, not to exceed any currently effective call price.
 - (5) Mortgage loans on real estate are stated at the aggregate unpaid balance adjusted for any unamortized discount or premium.

NOTES TO FINANCIAL STATEMENTS

- (6) Loan-backed and structured securities with a NAIC designation of 1 through 5 are reported at amortized cost using the effective yield method. Loan-backed and structured securities with a NAIC designation of 6 are reported at the lower of amortized cost or fair value. The difference between amortized cost and fair value is reflected in unassigned surplus as an unrealized loss for NAIC 6 securities. Effective yields are recalculated on either a prospective or retrospective basis, depending on the credit quality of the investment.
- (7) The Company accounts for investments in subsidiaries, controlled and affiliated (“SCA”) entities using the audited statutory equity of the investee if the entity is an insurance company. All non-insurance entities are carried at the U.S. GAAP equity of the investee.
- (8) The Company has ownership interests in various limited partnerships and limited liability companies which are carried at the underlying GAAP equity of the limited partnership or limited liability company.
- (9) Call options under the prescribed practice discussed above are recorded at amortized cost. Derivative instruments used in hedging transactions that meet the criteria of a highly effective hedge and are designated in a hedge accounting relationship, are reported in a manner that is consistent with the hedged items. All other derivative instruments are carried at fair value.
- (10) The Company does not use anticipated investment income as a factor in the premium deficiency calculation.
- (11) In Course of Settlement reserves are an inventory of known outstanding claims. Incurred But Not Reported reserves are based on historical experience. Open Claim reserves and Active Life reserves are calculated using reserve factor tables based on conservative mortality, morbidity and interest assumptions. Estimates for loss/claim adjustment expenses are not applicable.
- (12) The Company made no changes in 2023 to its capitalization threshold policy for fixed assets which was \$5,000.
- (13) The Company does not have pharmaceutical receivables.

D. Going concern
There are no principle conditions or events that raise doubt about the Company’s ability to continue as a going concern.

2. ACCOUNTING CHANGES AND CORRECTION OF ERRORS

The Company had no accounting changes or correction of errors during the reporting period.

3. BUSINESS COMBINATIONS AND GOODWILL

No business combinations occurred during the reporting period and no goodwill exists in the financial statements of the Company.

4. DISCONTINUED OPERATIONS

The Company did not discontinue any segment of its insurance business operations during the reporting period.

5. INVESTMENTS

- A. Mortgage Loans.
- (1) The Company acquired two new commercial mortgage loans each with an interest rate of 12.33% and 11.83% during the year ended December 31, 2023. The Company acquired one new residential mortgage loan with an interest rate of 3.69% during the year ended December 31, 2023.
 - (2) On the date of issuance, the maximum loan to value percentage of any such loan, exclusive of insured or guaranteed or purchase money mortgages was 78.80%.
 - (3) There were no taxes, assessments, or amounts advanced and not included in the mortgage loan total as of December 31, 2023.

(8) The Company does not have any mortgage loans derecognized as a result of foreclosure.
(9) The Company recognizes interest income on its impaired loans upon receipt.

B. Debt Restructuring

C. Reverse Mortgages
The Company did not have any reverse mortgages for the period ended December 31, 2023.

- D. Loan-Backed Securities
- (1) For loan-backed and structured securities, anticipated prepayments are used to determine the effective yield at purchase. At the end of each reporting period, changes in the estimated cash flows since the last reporting date are incorporated into both the yield and asset value on a retrospective basis or into the yield to be applied to future periods on a prospective basis. Each security is looked at on an individual basis to estimate cash flows. Prepayment assumptions for mortgage backed and asset-backed securities were obtained by researching broker/dealer survey values, analyzing recent trends from remittance reports and developing internal estimates. The Company used both internal personnel and external investment managers in determining the market value of its loan-backed securities.
- (2) The Company had the following other-than-temporary impairment (OTTI) during the year ended December 31, 2023, on a security within the scope of SSAP No. 43R, as a result of the intent to sell or inability or lack of intent to retain the security for a period of time sufficient to recover the amortized cost basis of the security.

- (4) As of December 31, 2023, the estimated fair value and gross unrealized losses for loan-backed and structured securities currently held by the Company, for which OTTI has not been recognized in earnings as a realized loss aggregated by length of time the securities have been in a continuous loss position, were as follows:

a. The aggregate amount of unrealized losses:		
1. Less than 12 Months	\$	(6,737,141)
2. 12 Months or Longer	\$	(446,957,404)
b. The aggregate related fair value of securities with unrealized losses:		
1. Less than 12 Months	\$	559,804,182
2. 12 Months or Longer	\$	7,139,776,568

- (5) Loan-backed and structured securities utilize discounted cash flow models to determine potential impairments. The primary assumptions driving the analysis were current prepayment rate (CPR), current annualized default rate (CDR) and severity on defaults. These assumptions were run on the underlying loan collateral within the pool and were consistent with the current credit and market estimates.
- E. Dollar Repurchase Agreements and/or Securities Lending Transactions
The Company has not entered into any dollar repurchase agreements and/or security lending transactions.
- F. Repurchase Agreements Transactions Accounted for as Secured Borrowing
(1) The Company utilizes repurchase agreements (which may be executed bilaterally or in tri-party form) as a form of institutional borrowing as a tool to manage liquidity and/or other risks inherent on the Company's balance sheet. When engaging in repurchase agreements, the Company must receive net cash in an amount equal to or greater than 95% of the market value of the collateral provided. The value of the collateral shall be marked to market daily and timely receipt/delivery of additional cash/collateral shall be made to maintain the 95% minimum cash/collateralization ratio.

The risks associated with the repurchase agreement program are primarily related to declines in the value of the securities sold for cash, which, if occurred, results in cash needing to be returned to the original purchasing party. The Company has multiple sources of additional liquidity including additional sources of institutional funding, retail funding, contractual cash flows from the asset portfolio, and sales of investment assets. The Company has approved a Liquidity Risk Policy and associated Liquidity Guidelines to manage the aggregate liquidity risk of the Company.

8. DERIVATIVE INSTRUMENTS

- A. Derivatives under SSAP No. 86-Derivatives

- (1) Uses of Derivatives: The Company is exposed to certain risks relating to its ongoing business operations. The Company’s risk of loss is typically limited to the fair value of its derivative instruments and not to the notional or contractual amounts of these derivatives. Risk arises from changes in the fair value of the underlying instruments. Such changes in value are generally offset by opposite changes in the value of the hedged item. For non-exchange traded derivative instruments, the Company is exposed to credit losses in the event of nonperformance of the counterparties. This credit risk is minimized by purchasing such agreements from financial institutions with high credit ratings, daily exchange of collateral, and by establishing and monitoring of transfer threshold amounts.
- (2) The primary risks managed by using derivative instruments are equity market risk, foreign currency risk and interest rate risk even if the position does not receive hedge accounting treatment. The most common types of derivatives used by the Company are call options, foreign currency forwards, exchange traded futures, equity total return swaps, interest rate options, and interest rate swaps.

Equity Market Risk Management: The Company purchases call options to manage the equity and market risk associated with products in which the interest credited is tied to an external equity or other market index. The Company sells FIA contracts where interest is credited to policyholders based on a percentage of the gain in a specified market index, which cannot be less than zero. Most of the premium received is invested in investment grade fixed income securities and a portion is used to purchase derivatives, typically call options, consisting of a range of maturities up to five years to fund the index credits due to the FIA policyholders. On the applicable anniversary dates of the FIA, the market index used to compute the index credits is reset and new call options are purchased to fund the next index credit. These call options are highly correlated to the portfolio allocations of the policyholders, such that the Company is economically hedged with respect to equity and/or market returns for the period covering the current policyholder crediting period. Although the call options are designed to be effective hedges from an economic standpoint, they do not meet the requirements for hedge accounting under SSAP 86. In addition to the call options, equity total return swaps, and futures are used to hedge the equity and market risk associated products in which interest credited is tied to these risks.

Foreign Currency Risk Management: The Company uses foreign currency forwards to reduce the risk from fluctuations in foreign currency exchange rates associated with its assets denominated in foreign currencies. In a foreign currency forward transaction, the Company agrees with another party to deliver a specified amount of an identified currency at a specified future date. The price is agreed upon at the time of the contract and payment for such a contract is made in a different currency at the specified future date. No cash is exchanged at the time the agreement is entered into.

Interest Rate Risk Management: The Company uses interest rate swaps and interest rate options to reduce market risks from changes in interest rates and to manage interest rate exposure arising from duration mismatches between assets and liabilities. In a swap, the Company agrees with counterparties to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts calculated by reference to an agreed notional amount. The Company currently uses interest rate swaps to synthetically convert fixed rate liabilities to floating rate liabilities. Additionally, the Company currently uses interest rate swaps to synthetically convert variable interest on existing financial instruments to fixed interest.

NOTES TO FINANCIAL STATEMENTS

(3) Call options, futures, and equity total return swaps: According to the guidance in SSAP No. 86, options, futures and total return swaps used for hedging the equity index crediting feature of the FIA product do not meet the effective hedge criteria in that the payment timing of the option, future, or equity total return swaps does not match payment timing of the liability. The guidance states that the options, futures, and equity total return swaps, therefore, must be carried at fair value. A Kansas statute allows the call options to be held at amortized cost. Upon maturity gains or losses on the call options are recognized in investment income through operations. Under the statute, the Company must demonstrate that the economic hedges are and are expected to continue to be highly effective.

Foreign currency forwards are reported by the Company in Schedule DB. The foreign currency exposure of forwards is represented by the fair value (market value) at the reporting date.

Interest rate swaps that qualify for hedge accounting in accordance with SSAP No. 86, Derivatives. Swaps that are designated in a hedge accounting relationship and highly effective are recorded in a manner that is consistent with the hedged asset or liability. Qualifying interest rate swaps used in fair value hedges on certain liabilities are carried at amortized cost. Qualifying interest rate swaps used in cash flow hedges on forecasted transaction related to variable interest on existing financial instruments are carried at amortized cost or fair value to match the hedged item. If during the life of the interest rate swap it is no longer effective as a hedge, valuation ceases to mirror the hedge item and the interest rate swap will be valued at current fair value. All other interest rate swaps not designated in hedge accounting relationship are carried at current fair value as of the reporting date.

Interest rate options are carried at current fair value on Schedule DB as of the reporting date.

- (4) There were no derivative contracts with financing premiums for the year ended December 31, 2023.
- (5) There were no net gains or losses during the reporting period that were excluded from the assessment of hedge effectiveness for the year ended December 31, 2023.
- (6) There were no net gains or losses recognized in unrealized gains or losses for the year ended December 31, 2023 resulting from derivatives no longer qualifying for hedge accounting.
- (7) As of December 31, 2023, the Company has no cash flow hedges exposure to variability in future cash flows for forecasted transaction, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments.
- (8) As of December 31, 2023, the Company has no non-discounted total premium cost for derivative contracts.
- (9) As of December 31, 2023, The Company does not have any aggregate excluded components (i.e., Time Value, Volatility Value, Cross Currency Basis Spread and Forward Points).

B. The company holds no derivatives that fall under SSAP No. 108-Derivative Hedging Variable Annuity Guarantees guidance.

9. INCOME TAXES

The application of SSAP No. 101 - Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10 requires a company to evaluate the recoverability of deferred tax assets and to establish a valuation allowance if necessary to reduce the deferred tax asset to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary and, if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance, the Company considers many factors, including: (1) the nature of the deferred tax assets and liabilities; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carry back years as well as projected taxable earnings exclusive of reversing temporary differences and carry forwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the deferred tax assets; and (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although the realization is not assured, management believes it is more likely than not that the deferred tax assets, net of valuation allowances, will be realized. The Company has recorded a valuation allowance as of December 31, 2023 and December 31, 2022 as indicated below.

A-D Defined Benefit Plans

The Company participates in a qualified, noncontributory defined benefit pension plan sponsored by SBC, the Company's indirect parent. Benefits are based on years of service and an employee’s highest average compensation over a period of five consecutive years during the last 10 years of service. Effective in 2007, the plan sponsor froze the defined benefit pension plan with no additional benefits accruing to employees after the freeze. The sponsor's policy has been to contribute funds to the plan in amounts required to maintain sufficient plan assets to provide for accrued benefits. In applying this general policy, the sponsor considers, among other factors, the recommendations of its independent consulting actuaries, the requirements of federal pension law, and the limitations on deductibility imposed by federal income tax law. Plan assets are primarily invested in exchange traded funds which hold various equity and fixed income investments.

E. Defined Contribution Plan.

The Company, though it has no employees, participates in a profit-sharing and savings plan sponsored by SBC. The Company thus made no direct contributions to this plan in 2023 and 2022 but indirectly incurred costs for the plan.

F. Multi-Employer Plans

The Company does not participate in a multi-employer plan.

G. Consolidated/Holding Company Plans

The Company does not participate in a consolidated/holding company plan.

H. Postemployment Benefits and Compensated Absences

Certain former employees and their spouses are covered by a nonqualified postretirement benefits plan sponsored by SBC. The Sponsor’s obligation for postretirement benefits and the Company’s obligations for compensated absences have been accrued during the reporting period.

I. Impact of Medicare Modernization Act on Postretirement Benefits. All employees are covered by a nonqualified postretirement benefits plan sponsored by SBC.

Outstanding commitments as of December 31, 2023 were \$133.0 million for unrelated parties and \$15.0 thousand for related parties, for 2022 outstanding commitments were \$178.6 million for unrelated parties and none for related parties.
- B. Guaranty fund assessments are levied on the Company by life and health guaranty associations in most states to cover policyholder losses attributable to insolvent or rehabilitated insurers. At December 31, 2023 and 2022, the Company reserved \$990,000 to cover current and estimated future assessments, net of related premium tax credits.
- C. There were no gain contingencies as of December 31, 2023 or 2022.
- D. The Company is a defendant in a putative class action, Ella Clinton, et al., v. Security Benefit Life Insurance Company, initially filed in the United States District Court, Southern District of Florida, on November 20, 2019. A First Amended Class Action Complain ("FAC") that includes additional named plaintiffs and causes of action was filed on January 21, 2020. The action was transferred to the United States District Court, District of Kansas. The allegations of the FAC arise out of the marketing and sale of certain of the Company’s FIA products. In their FAC, Plaintiffs assert claims for violation of the federal Racketeer Influenced and Corrupt Organizations Act, violations of California's, Illinois', Arizona's and Nevada's respective unfair competition, consumer fraud, and/or deceptive business practices acts, and common law fraud under the laws of Florida, California, Illinois, Arizona and Nevada. The Company’s motion to dismiss was granted without prejudice on February 12, 2021. Plaintiffs filed a notice of appeal to the United States Court of Appeals Tenth Circuit on February 19, 2021. On March 28, 2023, the Tenth Circuit reversed the District Court's dismissal of the case and remanded the case back to the District Court of Kansas for further proceedings. On April 11, 2023, the Company filed a petition requesting that the appeal be reheard by all of the Tenth Circuit judges on grounds, among others, that the decision conflicts with United States Supreme Court precedent; the Company’s petition was denied by the Tenth Circuit on October 13, 2023. The Tenth Circuit’s decision to reverse and remand the case was not based on the merits of any issue, but rather assumed that the allegations were correct and held that the allegations were adequate to require that an evidentiary record be developed with respect to them before the District Court and upon which a decision should be based. Although potential liability is reasonably possible, no reasonable estimate can be made at this time regarding the amount or range of any possible loss that may result from this suit. The Company believes that it has substantial defenses to the claims alleged and intends to vigorously defend itself in the action.

In addition, the Company is periodically party to legal and arbitral proceedings and subject to complaints, and the like, and is periodically examined by its regulators and may discuss certain matters with its regulators that come up during such examinations or otherwise. With the possible exception of the matter noted above, management currently does not believe that any litigation, arbitration, complaint or other such matter to which the Company is party, or that any actions by its regulators with respect to any such examinations or matters under discussion with them, will, alone or collectively, materially adversely affect the Company’s results of operations or financial condition.

20. FAIR VALUE MEASUREMENTS

- A. The Company groups its financial assets and liabilities measured at fair value into three levels, based on the inputs and assumptions used to determine the fair value. These levels are as follows:

Level 1 – Valuations are based on unadjusted quoted prices in active markets for identical assets or liabilities.

NOTES TO FINANCIAL STATEMENTS

Level 2 – Valuations are based upon quoted prices for similar instruments in active markets, quoted prices for identical instruments or similar instruments in markets that are not active, and valuation techniques for which significant assumptions and inputs are observable in active markets. Valuations are obtained from third-party pricing services or utilizing inputs that are observable or derived principally from or corroborated by observable active market data.

Level 3 – Valuations of assets and liabilities are derived from techniques in which one or more significant inputs are not observable in the market, such as discounted cash flow models and spread-based models.

The Company bases fair values on the price that would be received to sell an asset (exit price) or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company’s policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements.

(1) The following table presents information about the Company’s assets and liabilities measured and reported at fair value as of December 31, 2023:

Bonds include fixed maturities and asset-backed securities. Fair values obtained from pricing services, applicable market indices, or internal models with substantially all observable inputs are included in Level 2. Securities are generally assigned to Level 3 in cases where internal models with unobservable inputs are utilized or where broker/dealer quotes are significant inputs to the valuation and there is a lack of transparency as to whether these quotes are based on information that is observable in the marketplace.

Cash equivalents include money market mutual funds. Fair values are determined using unadjusted quoted prices for identical instruments traded in active markets and are included in Level 1.

Equity securities include common and preferred stock. When available, the estimated fair value of unaffiliated common stocks are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1. Fair values obtained from pricing services with substantially all observable inputs, or based on recently executed trades are included in Level 2. Fair Value for Level 3 securities are obtained utilizing third-party valuation services for which significant inputs are unobservable.

Other invested assets include investments with characteristics of common stock. Fair value for Level 3 securities utilize internal pricing models specific to the asset where significant inputs may be unobservable in the marketplace.

The separate account assets primarily consist of publicly traded equity securities using quoted market prices and are considered to be Level 1. Investments in bonds are included in Level 2 and Level 3, using valuation methodologies described above in Bonds. The investments in private notes and partnerships are reflected in Level 3.

Derivative assets and derivative liabilities include exchange traded derivatives valued using quoted prices in active markets for identical assets when available, which are included in Level 1. The fair value of other derivatives are determined using market observable inputs and are included in Level 2. Derivatives presented in the table above represent only those derivatives that are carried at estimated fair value. Accordingly, the amounts above exclude derivatives carried at amortized cost.

NOTES TO FINANCIAL STATEMENTS

(3-5) Securities may be transferred in or out of level 3 based on the availability of observable market information used to determine the fair value of the security. The availability of observable market information varies based on market conditions and may cause securities to move in and out of levels from reporting period to reporting period.

Valuations may fall within Level 1, 2, or 3 depending upon the methodologies and inputs used to estimate fair value for each specific security. In general, the Company seeks to value securities using third-party services. Securities not valued by pricing services are submitted to independent brokers for valuation and, if those are not available, internally developed pricing models are used to value investments using methodologies and inputs as described above.

Bonds
Bonds measured at fair value are valued using methodologies where the information is generated by market transactions involving identical or comparable assets, as well as discounted cash flow methodologies. Common inputs include prices from recently executed transactions of similar securities, broker/dealer quotes, benchmark yields, spreads off benchmark yields, interest rates and U.S. Treasury or swap curves. Specifically for loan-backed securities, key inputs include CPR, CDR and severity on defaults based on past performance of the underlying collateral and current market data. Level 2 securities include securities where the significant inputs are observable in the marketplace. Securities are generally assigned to Level 3 in cases where internal models with unobservable inputs are utilized or where broker/dealer quotes are significant inputs to the valuation and there is a lack of transparency as to whether these quotes are based on information that is observable in the marketplace.

Preferred stocks
Level 2 securities are primarily preferred stocks valued using pricing for similar securities, recently executed transactions, broker/dealer quotes and other pricing models utilizing market observable inputs. Preferred stocks included in Level 3 include securities valued using internal models in which significant inputs are unobservable in the marketplace.

Common stocks – unaffiliated
Fair values of common stocks are determined using quoted prices in active markets for identical assets when available, which are included in Level 1. Fair values obtained from pricing services with substantially all observable inputs are included in Level 2. Fair values might also be determined using broker quotes or through the use of internal models or analysis that incorporates significant assumptions deemed appropriate given the circumstances and consistent with what other market participants would use when pricing such securities. These assets are included in Level 3.

NOTES TO FINANCIAL STATEMENTS

Mortgage loans

The carrying values of the residential mortgage loans approximate their fair values. Fair values of the commercial mortgage loans are estimated using discounted cash flow analysis based on a variety of factors including credit spreads, duration of the loans, and prepayment terms and assumptions which are unobservable inputs and classified as Level 3.

Cash equivalents

Cash equivalents include money market mutual funds. Fair values are determined using unadjusted quoted prices for identical instruments traded in active markets and are included in Level 1.

Short-term investments

Short-term investments included in Level 2 include short-term notes receivable and other short-term bonds. Short-term notes receivable and short-term bonds included in level 3 are valued utilizing broker quotes or through the use of internal models or analysis that incorporate significant assumptions deemed appropriate given the circumstances and consistent with what other market participants would use when pricing such investments.

The fair value of these investments is based on the methodology described above for Bonds and included in Level 2. Fair value for Level 3 securities utilize internal pricing models specific to the assets where significant inputs may be unobservable in the market place.

Collateral pledged on derivatives

The carrying amount for collateral pledged on derivatives approximates fair value due to its short-term nature and the Company’s belief that there is minimal risk of material changes in the credit of the counterparty. These amounts are generally classified as Level 2.

Investment income due and accrued

The Company believes there is minimal risk of material changes in both credit of the issuer and interest rates such that the carrying value of investment income due and accrued approximates fair value. Generally, investment income due and accrued is classified as Level 2.

Separate account assets

The separate account assets primarily consist of publicly traded equity securities using quoted market prices and are considered to be Level 1. Investments in bonds are included in Level 2 and Level 3, using valuation methodologies described above in Bonds. The investments in private notes and partnerships are reflected in Level 3.

NOTES TO FINANCIAL STATEMENTS

B. General Nature and Characteristics of Separate Account Business:

The separate and variable accounts held by the Company relate primarily to individual and group variable annuity contracts and funding agreements of a non-guaranteed return nature. The net investment experience of the separate account is credited directly to the policyholder and can be positive or negative. The variable annuity contracts generally provide an incidental death benefit equal to the greater of the account value or premiums paid less any reductions caused by withdrawals. However, many contracts also have a minimum death benefit equal to either the highest account value on a specified anniversary or the accumulation of premiums less any reductions caused by withdrawals at a specified interest rate. Some contracts may have guaranteed minimum living benefits. The living benefit may be a guaranteed minimum income benefit, a guaranteed minimum withdrawal benefit, or a guaranteed minimum accumulation benefit. The minimum death benefit and living benefit reserves are set forth in Exhibit 5, Section B, of the Company’s general account annual statement. The assets and liabilities of these separate accounts are carried at market value. Also included in the Company’s separate accounts are individual variable life and variable universal life contracts which are insignificant in relation to the annuity business held in the separate account.
