# NOTES TO FINANCIAL STATEMENTS

## 1. Summary of Significant Accounting Policies

A. The Company prepares its statutory financial statements in conformity with accounting practices prescribed or permitted by the state of Kansas for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Kansas law. The National Association of Insurance Commissioner's (NAIC) Accounting Practices and Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Kansas subject to any deviation prescribed or permitted by the Kansas Insurance Department (KID).

The Company sells fixed index deferred annuity (FIA) contracts which credit interest to the policyholder based on a percentage of the gain in a specified market index. The Company uses a portion of the premium received on these policies to purchase one year and multi-year call options depending on the index crediting option specified by the policyholder. The call options are economic hedges used to fund the index credits to the policyholder. The call options are not considered to be effective hedges for accounting purposes under the NAIC Accounting Practices and Procedures Manual, SSAP No. 86 – Derivatives (SSAP No. 86).

SSAP No. 86 specifies that "Derivative instruments used in hedging transactions that do not meet or no longer meet the criteria of an effective hedge shall be accounted for at fair value and the changes in fair value shall be recorded as unrealized gains or unrealized losses (referred to as fair value accounting)." Although highly effective on an economic basis, the call options used to hedge the interest index crediting features of the Company's FIA products do not meet the effective hedge criteria for accounting purposes in that the payment timing of the option does not match the payment timing of the liability (i.e., options pay out annually or other interval based on the index term and the payments to policyholders related to the liability may be paid out over a longer term). The options therefore, would be valued at fair value with changes in the fair value recorded as unrealized gains or losses.

The reserving requirement for the aforementioned policies falls under Actuarial Guideline (AG) 35, which provides the manner in which current and future index credits are valued. Changes in the reserve liability are reported through operations.

Kansas statutes prescribe accounting for one year call options and multi-year call options in a manner that differs from NAIC SAP. This differing accounting practice is conditioned on the hedging program referenced above being economically effective and allows the Company to report call options at amortized cost. It also allows the reserve calculation to assume the fair value of the call options associated with the current index crediting term is zero and index interest credited to FIA contracts is reflected when realized.

The impact of the prescribed practice discussed above, including the impact of income taxes, was to decrease year-to-date 2025 statutory income by $64.6 million and to increase statutory surplus by $221.3 million.

B. The preparation of financial statements in conformity with the NAIC Annual Statement Instructions and NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. It also requires disclosure of contingent assets and liabilities at the date of the financial statement. Actual results could differ from those estimates.

C. Accounting Policy

(2) Issuer credit obligations not backed by loans are valued at amortized cost using the interest rate method, except where mandatory prepayments are required or where an earlier call date creates a lower yield. Issuer credit obligations with a NAIC designation of 6 are stated at the lower of amortized cost or fair value.

(6) Asset-backed securities, excluding residual tranches or interests, with a NAIC designation of 1 through 5 are reported at amortized cost using the effective yield method. Asset-backed securities with a NAIC designation of 6 are reported at the lower of amortized cost or fair value. The difference between amortized cost and fair value is reflected in unassigned surplus as an unrealized loss for NAIC 6 securities. Effective yields are recalculated on either a prospective or retrospective basis, depending on the credit quality of the investment.

Residual tranches or interests of asset-backed securities are reported on Schedule BA Other Long Term Invested Assets at the lower of amortized cost or fair value.

# NOTES TO FINANCIAL STATEMENTS

D. Going concern
There are no conditions or events that raise doubt about the Company's ability to continue as a going concern.

## 2. Accounting Changes and Correction of Errors

Accounting Pronouncements
In August 2023, the NAIC revised SSAP No. 26, Bonds (SSAP No. 26) and SSAP No. 43, Loan-Backed and Structured Securities (SSAP No.43), effective January 1, 2025. The revisions adopt a principles-based bond definition for determining the investments eligible for bond accounting and reporting as issuer credit obligations and asset-backed securities. In December 2024, the NAIC revised SSAP No. 26R to reinstate disclosure language and reporting category provisions. The revisions specify that, in the financial statements, for each annual balance sheet presented, disclosures for assets receiving bond treatment should be categorized and subcategorized as reported in Annual Statement Schedule D-Part 1, Section 1 (Issuer Credit Obligations) and Section 2 (Asset- Backed Securities). The Company adopted the revised guidance on January 1, 2025 resulting in no securities reclassified off Schedule D-1 and no impact to surplus.

Correction of Error
The Company had no correction of errors during the reporting period.

## 3. Business Combinations and Goodwill

No business combinations occurred during the reporting period and no goodwill exists in the financial statements of the Company.

## 4. Discontinued Operations

The Company did not discontinue any segment of its insurance business operations during the reporting period.

## 5. Investments

A. Mortgage Loans.
(1) The Company acquired four commercial mortgage loans with interest rates at issuance ranging from 6.52% to 10.21% and one residential mortgage loan with an interest rate at issuance of 4.86% during the reporting period.
(2) The maximum percentage of any one loan to the value of security at the time of the loan, exclusive of insured or guaranteed or purchase money mortgages was 80.95%.
(3) There were no taxes, assessments, or amounts advanced and not included in the mortgage loan total as of June 30, 2025.
(4) An age analysis of mortgage loans, aggregated by type is as follows:

(7) The Company does not have any allowances for credit losses as of June 30, 2025.
(8) The Company does not have any mortgage loans derecognized as a result of foreclosure.
(9) The Company recognizes interest income on its impaired loans upon receipt.

B. Debt Restructuring
The Company did not have any restructured debt for the period ended June 30, 2025.

C. Reverse Mortgages
The Company did not have any reverse mortgages for the period ended June 30, 2025.

D. Asset-Backed Securities
(1) For asset-backed securities, anticipated prepayments are used to determine the effective yield at purchase. At the end of each reporting period, changes in the estimated cash flows since the last reporting date are incorporated into both the yield and asset value on a retrospective basis or into the yield to be applied to future periods on a prospective basis. Each security is looked at on an individual basis to estimate cash flows. Prepayment assumptions for mortgage backed and asset-backed securities were obtained by researching broker/dealer survey values, analyzing recent trends from remittance reports and developing internal estimates. The Company used both internal personnel and external investment managers in determining the market value of its asset-backed securities.
(2) The Company did not record an other-than-temporary impairment (OTTI) during the current period, on a security within the scope of SSAP No. 43, as a result of the intent to sell or inability or lack of intent to retain the security for a period of time sufficient to recover the amortized cost basis of the security.
(3) The Company did not record any OTTI for the current period, where the present value of cash flows expected to be collected is less than the amortized cost basis of the security.
(4) As of June 30, 2025, the estimated fair value and gross unrealized losses for asset-backed securities currently held by the Company, for which OTTI has not been recognized in earnings as a realized loss aggregated by length of time the securities have been in a continuous loss position, were as follows:

| | | |
|---|---|---|
| a. The aggregate amount of unrealized losses: | | |
| | 1. Less than 12 Months | $ (15,590,157) |
| | 2. 12 Months or Longer | $ (95,900,785) |
| b. The aggregate related fair value of securities with unrealized losses: | | |
| | 1. Less than 12 Months | $ 1,656,151,532 |
| | 2. 12 Months or Longer | $ 1,466,030,791 |

(5) Asset-backed securities utilize discounted cash flow models to determine potential impairments. The primary assumptions driving the analysis were current prepayment rate (CPR), current annualized default rate (CDR) and severity on defaults. These assumptions were run on the underlying loan collateral within the pool and were consistent with the current credit and market estimates.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

(1) The Company participates in a securities lending program. The securities lending agreements require a minimum of 102% of the fair value of securities loaned under securities lending agreements to be maintained as collateral. Cash collateral received is invested and reported in Schedule DL and an offsetting collateral liability is included in Page 3, Line 24.10, Payable for securities lending.

(2) As of June 30, 2025, the Company has lent assets with a carrying value of $36,908,374 and with a fair market value of $39,155,741. The Company lends the securities and the borrower provides cash collateral and short term securities to support the loan. The aggregate amount of collateral received was $40,658,596.

(6) The Company has accepted no non-cash collateral in the form of US government debt that is not permitted by contract. or custom to sell or repledge.

(7) Collateral for Securities Lending Transactions that Extend Beyond One Year from the Reporting Date: Not applicable.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

(1) The Company utilizes repurchase agreements (which may be executed bilaterally or in tri-party form) as a form of institutional borrowing as a tool to manage liquidity and/or other risks inherent on the Company's balance sheet. When engaging in repurchase agreements, the Company must receive net cash in an amount equal to or greater than 95% of the market value of the collateral provided. The value of the collateral shall be marked to market daily and timely receipt/delivery of additional cash/collateral shall be made to maintain the 95% minimum cash/collateralization ratio.

The risks associated with the repurchase agreement program are primarily related to declines in the value of the securities sold for cash, which, if that occurs, results in cash having to be returned to the original purchasing party. The Company has multiple sources of additional liquidity including additional sources of institutional funding, retail funding, contractual cash flows from the asset portfolio, and sales of investment assets. The Company has a Liquidity Risk Policy and associated Liquidity Guidelines to manage the aggregate liquidity risk of the Company.

## 10. Information Concerning Parent, Subsidiaries, and Affiliates and Other Related Parties

The Company held investments, either directly or indirectly, in certain securitizations in which affiliated parties act as collateral managers. The repayment of these investments is dependent upon the performance of the borrowers of the underlying assets held by the securitization vehicle. The borrowers are not affiliated with the Company and the Company does not have recourse to the affiliated collateral manager in the case of non-performance of the unaffiliated borrower. The total carrying value of these investments was $4,931,231,780 as-of the period ended June 30, 2025.

## 11. Debt

A. Capital Notes: The Company has not issued any capital notes during the reporting period.

The Company has access to a $362,023,691 line of credit facility from the FHLB (Federal Home Loan Bank of Topeka). There were no borrowings outstanding in connection with this facility at June 30, 2025. Any overnight borrowings in connection with this line of credit would have borne interest at 4.59% as of June 30, 2025. The amount of the line of credit is determined by the fair market value of the Company's available collateral held by FHLB, primarily mortgage-backed securities and commercial loans, not already pledged as collateral under existing contracts as of June 30, 2025.

B. FHLB Agreements

(1) The Company is a member of the FHLB. Through its membership, the Company has conducted business activity (borrowings) with the FHLB. It is part of the Company's strategy to utilize these funds as spread lending and liquidity. The Company has determined the actual/estimated maximum borrowings as $0. The Company calculated this amount in accordance with internal limits with regard to pledged collateral.

# NOTES TO FINANCIAL STATEMENTS

## 14. Liabilities, Contingencies and Assessments

The Company is a defendant in a putative class action, Ella Clinton, et al., v. Security Benefit Life Insurance Company, initially filed in the United States District Court, Southern District of Florida, on November 20, 2019. A First Amended Class Action Complaint ("FAC") that includes additional named plaintiffs and causes of action was filed on January 21, 2020. The action was transferred to the United States District Court, District of Kansas. The allegations of the FAC arise out of the marketing and sale of the Company's leading fixed index annuity products at the time. In their FAC, the plaintiffs assert claims for violation of the federal Racketeer Influenced and Corrupt Organizations Act, violations of California's, Illinois' and Arizona's respective unfair competition, consumer fraud and/or deceptive business practices acts, and common law fraud under the laws of Florida, California, Illinois, and Arizona.

The Company's motion to dismiss was granted by the District Court on February 12, 2021, but the dismissal was reversed by the United States Court of Appeals for the Tenth Circuit on March 28, 2023, in a split decision. The Company's request for a rehearing en banc was denied. The reversal was not based on the merits of any issue; the applicable Federal Rules of Civil Procedure required the Court of Appeals to assume the truth of the plaintiffs' allegations and to view the facts in a light most favorable to the plaintiffs. The issues will be decided on an evidentiary record established at the District Court. On November 20, 2023, the Company filed its Answer and Affirmative Defenses to the FAC, and the parties thereafter commenced discovery.

On June 13, 2025, the parties substantially completed discovery, and the plaintiffs filed their Motion for Class Certification. The Company's opposition to the motion is due on September 29, 2025, and the plaintiffs' reply in support of the Motion for Class Certification is due on December 15, 2025. Briefing on any motions to exclude each party's class certification experts is scheduled to conclude by February 9, 2026. A date has not yet been set for a hearing on the Motion for Class Certification.

Although potential liability is reasonably possible for the Company from this lawsuit, no reasonable estimate can be made at this time regarding the amount or range of any possible loss that may result. The Company believes that it has substantial defenses to the claims alleged and intends to continue to defend itself vigorously in the lawsuit.

In addition, the Company is periodically party to legal and arbitral proceedings and subject to complaints, and the like, and is periodically examined by its regulators and may discuss certain subjects with its regulators that come up during such examinations or otherwise. Management currently does not believe that any of the foregoing matters in this paragraph will, alone or collectively, materially adversely affect the Company's results of operations or financial condition.

A. The Company has no Administrative Services Only (ASO) uninsured accident and health plans.
B. The Company has no Administrative Services Contracts (ASC).
C. The Company had no Medicare or Other Similarly Structured Cost Based Reimbursement Contracts.

## 19. Direct Premium Written/Produced by Managing General Agents/Third Party Administrators

The Company markets its products through independent agents/agencies.

## 20. Fair Value Measurements

A. The Company groups its financial assets and liabilities measured at fair value into three levels, based on the inputs and assumptions used to determine the fair value. These levels are as follows:

Level 1 – Valuations are based on unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 – Valuations are based upon quoted prices for similar instruments in active markets, quoted prices for identical instruments or similar instruments in markets that are not active, and valuation techniques for which significant assumptions and inputs are observable in active markets. Valuations are obtained from third-party pricing services or utilizing inputs that are observable or derived principally from or corroborated by observable active market data.

Level 3 – Valuations of assets and liabilities are derived from techniques in which one or more significant inputs are not observable in the market, such as discounted cash flow models and spread-based models.

The Company bases fair values on the price that would be received to sell an asset (exit price) or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements.

Issuer credit obligations and asset-backed securities. Fair values are obtained from pricing services, applicable market indices, or internal models with substantially all observable inputs and are included in Level 2. Securities are generally assigned to Level 3 in cases where internal models with unobservable inputs are utilized or where broker/dealer quotes are significant inputs to the valuation and there is a lack of transparency as to whether these quotes are based on information that is observable in the marketplace.

Cash equivalents include money market mutual funds. Fair values are determined using unadjusted quoted prices for identical instruments traded in active markets and are included in Level 1.

Equity securities include common and preferred stock. When available, the estimated fair value of unaffiliated common stocks are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1. Fair values obtained from pricing services with substantially all observable inputs, or based on recently executed trades are included in Level 2. Fair Value for Level 3 securities are obtained utilizing third-party valuation services for which significant inputs are unobservable.

Other invested assets include investments with characteristics of common stock. Fair value for Level 3 securities utilize internal pricing models specific to the asset where significant inputs may be unobservable in the marketplace.

The separate account assets primarily consist of publicly traded equity securities using quoted market prices and are considered to be Level 1. Investments in bonds are included in Level 2 and Level 3, using valuation methodologies described above in Bonds. The investments in private notes and partnerships are reflected in Level 3.

Derivative assets and derivative liabilities include exchange traded derivatives valued using quoted prices in active markets for identical assets when available, which are included in Level 1. The fair value of other derivatives are determined using market observable inputs and are included in Level 2. Derivatives presented in the table above represent only those derivatives that are carried at estimated fair value. Accordingly, the amounts above exclude derivatives carried at amortized cost.

(2) The following table summarizes changes in assets measured at fair value using significant unobservable inputs as of June 30, 2025:

(3-5) Securities may be transferred in or out of level 3 based on the availability of observable market information used to determine the fair value of the security. The availability of observable market information varies based on market conditions and may cause securities to move in and out of levels from reporting period to reporting period.

Valuations may fall within Level 1, 2, or 3 depending upon the methodologies and inputs used to estimate fair value for each specific security. In general, the Company seeks to value securities using third-party services. Securities not valued by pricing services are submitted to independent brokers for valuation and, if those are not available, internally developed pricing models are used to value investments using methodologies and inputs as described above.

B. The Company provides additional fair value information in Note 5.

Issuer credit obligations & Asset-backed securities
Fair value of Issuer credit obligations and asset-backed securities are valued using methodologies where the information is generated by market transactions involving identical or comparable assets, as well as discounted cash flow methodologies. Common inputs include prices from recently executed transactions of similar securities, broker/dealer quotes, benchmark yields, spreads off benchmark yields, interest rates and U.S. Treasury or swap curves. Specifically for asset-backed securities, key inputs include CPR, CDR and severity on defaults based on past performance of the underlying collateral and current market data. Level 2 securities include securities where the significant inputs are observable in the marketplace. Securities are generally assigned to Level 3 in cases where internal models with unobservable inputs are utilized or where broker/dealer quotes are significant inputs to the valuation and there is a lack of transparency as to whether these quotes are based on information that is observable in the marketplace.

Mortgage loans
The carrying values of the residential mortgage loans approximate their fair values. Level 2 includes commercial mortgages that were recently acquired at observable market rates. Fair values of other commercial mortgage loans are estimated using discounted cash flow analysis based on a variety of factors including credit spreads, duration of the loans, and prepayment terms and assumptions which are unobservable inputs and classified as Level 3.

Cash equivalents
Cash equivalents include money market mutual funds and United States treasuries. Fair values determined using unadjusted quoted prices for identical instruments traded in active markets are included in Level 1. Level 2 securities include securities where the significant inputs are observable in the marketplace.

Short-term investments
Short-term investments included in Level 2 include short-term notes receivable and other short-term bonds. Short-term notes receivable and short-term bonds included in Level 3 are valued utilizing broker quotes or through the use of internal models or analysis that incorporate significant assumptions deemed appropriate given the circumstances and consistent with what other market participants would use when pricing such investments.

Policy loans
The estimated fair value for contract loans are determined using a discounted cash flow model applied to groups of similar contract loans determined by the nature of the underlying insurance liabilities, using unobservable inputs and is classified as Level 3.

Derivative assets and derivative liabilities
Level 1 derivatives include exchange traded derivatives valued using quoted prices in active markets for identical assets when available. Level 2 derivatives include call options, forwards and certain swaps valued with models that use market observable inputs.

Other invested assets
Other invested assets include surplus notes, collateral loans, and other investments with characteristics of fixed income. The fair value of these investments is based on the methodology described above for Bonds and included in Level 2. Fair value for Level 3 securities utilize internal pricing models specific to the assets where significant inputs may be unobservable in the market place.

Securities lending assets and liabilities
See Note 5 for information regarding securities lending activity, for which the Company considers the liability to return collateral to approximate fair value of the collateral originally received. These amounts are classified as Level 1.

Collateral pledged on derivatives
The carrying amount for collateral pledged on derivatives approximates fair value due to its short-term nature and the Company's belief that there is minimal risk of material changes in the credit of the counterparty. These amounts are generally classified as Level 2.

Investment income due and accrued
The Company believes there is minimal risk of material changes in both credit of the issuer and interest rates such that the carrying value of investment income due and accrued approximates fair value. Generally, investment income due and accrued is classified as Level 2.

Separate account liabilities
The fair value of separate account liabilities are estimated based on the fair value of separate account assets. The separate account assets primarily consist of publicly traded equity securities using quoted market prices and are considered to be Level 1. Investments in bonds are included in Level 2 and Level 3, using valuation methodologies described above in Bonds. The investments in private notes and partnerships are reflected in Level 3.
