How does RateTrack® Annuity work?

RateTrack® Annuity launched in March 2016 as the industry's first floating rate annuity. This annuity is closely tied to the 3 Month CME Term SOFR Reference Rate.

During the RateTrack® Annuity's Guarantee Period (5 or 7 years), interest is calculated and credited on the combination of a fixed interest rate — the Guarantee Period Base Rate — and a floating rate based on the 3 Month CME Term SOFR Reference Rate.

How has RateTrack® Annuity helped Owners?

Check out how a combined, complementary approach can maximize savings with protection of principal and no market risk. Our Security Benefit [laddering](#) strategy can help your clients have the best of both worlds — a MYGA with a competitive rate and a floating rate annuity, RateTrack® Annuity, that can help them take advantage of rising rates automatically.
