¹The DCA+ must be established on a contract when it is issued. Once the DCA+ ceases, it cannot begin again. The actual effective rate will be less than these amounts because the DCA+ account will be depleted over the 12- or 6-month period. Annual effective yields are used to calculate the return on investment, but do not reflect the funds a customer will receive. Funds in a DCA account must be transferred into other accounts using a schedule of equal payments over a set time period.
