

Rising Rates

RateTrack[®] Annuity could be a good complement to your portfolio to help you meet financial goals and fulfill your retirement aspirations.

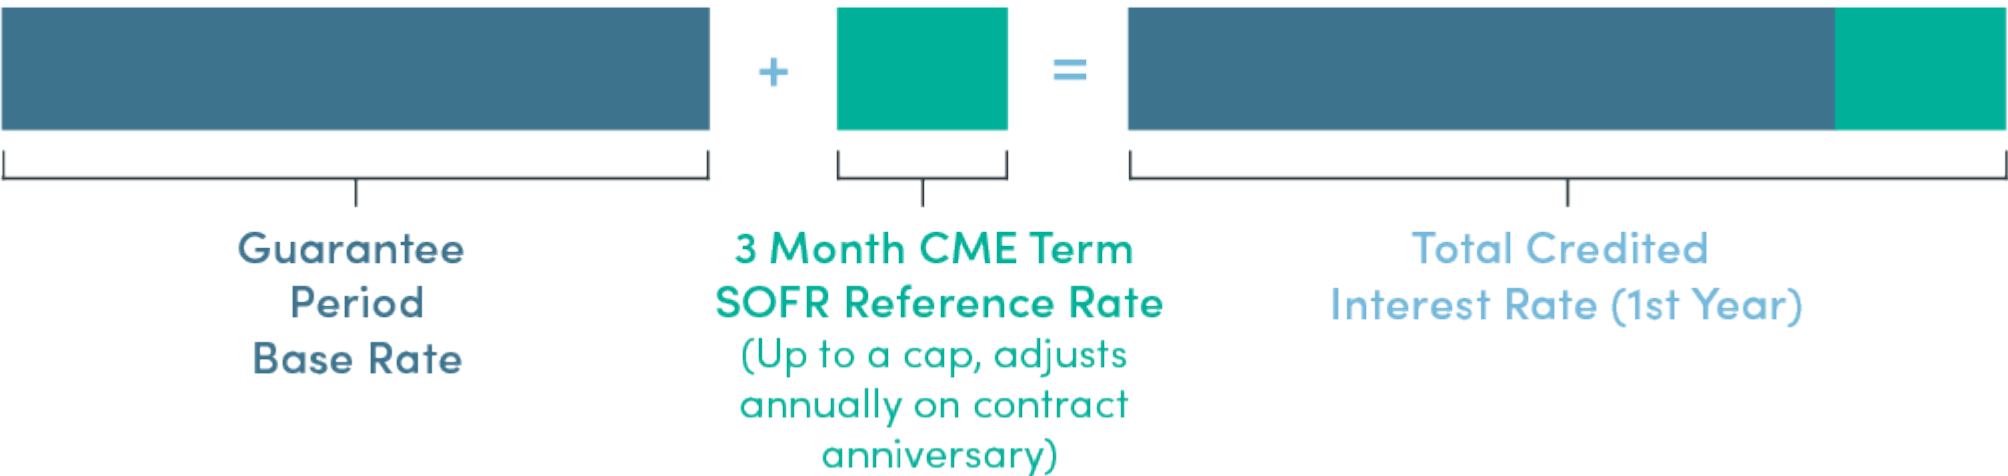

A few advantages of RateTrack[®] Annuity:

- Potential to receive higher interest rates automatically if rates rise during your contract Guarantee Period

- Ability to access a portion of your funds without penalty^{3,4}
- Ability to access some or all of your money in the event of nursing home confinement or terminal illness^{1,3}
- Death benefit

How does RateTrack[®] Annuity work?

RateTrack[®] Annuity launched in March 2016 as the industry’s first floating rate annuity.

During the RateTrack[®] Annuity’s Guarantee Period (5 or 7 years), interest is calculated and credited on the combination of a fixed interest rate — the Guarantee Period Base Rate — and a floating rate based on the 3 Month CME Term SOFR Reference Rate.

Although some bond funds may increase when interest rates rise, [bond prices and interest rates usually have an inverse relationship](#). As rates rise, bond values fall, and vice versa. A floating rate annuity like RateTrack[®] Annuity is not correlated to the market and could be something to consider as part of your retirement savings strategy.

¹Withdrawals are subject to ordinary income tax and, if made before age 59½, may be subject to a 10% penalty tax.

²Each Guarantee Period has its own surrender charge schedule. Early withdrawals in excess of the free withdrawal amount are subject to a surrender charge unless the withdrawal is pursuant to the Nursing Home Waiver or Terminal Illness Waiver.

³Nursing Home Waiver is not available in CA and MA, and Terminal Illness Waiver is not available in CA and NJ. Other state variations may apply.

⁴After the 3rd Contract Anniversary, any request to waive surrender charges must be made on forms provided by Security Benefit Life Insurance Company (SBL) and must be accompanied by a physician's statement. Refer to the contract for details. Not available in all states.
