

Re-Register & Sign In

You have been redirected from SecurityRetirement.com to SecurityBenefit.com so you can begin using our new, more secure account sign in process.

At Security Benefit we have enhanced our website security, including the registration/sign in process, to keep your information secure and visible only to you. With this change, you will need to follow the instructions and buttons below to access your account information.

Select the “RE-REGISTER YOUR ONLINE ACCOUNT” button below to begin the process:

Step 1: Follow the steps and complete the registration process. You may need to create a new username.

Step 2: Continue the email prompts to set up a new password.

Step 3: Establish a [multi-factor authentication method](#) (i.e. how you’d like to verify your sign in: text, email or call back). **We recommend setting up more than one method.**

Step 4: Sign in with your new username and password.
