You should consider the investment objectives, risks, charges, and expenses of the mutual funds carefully before investing. You may obtain prospectuses or summary prospectuses (if available) that contain this and other information about the mutual funds by calling our Service Center at 800.888.2461. The principal value of target date funds is not guaranteed at any time, including at or after the target date, which is the approximate date when investors turn age 65. The funds invest in a broad range of underlying mutual funds that include stocks, bonds, and short-term investments and are subject to the risks of different areas of the market. The funds emphasize potential capital appreciation during the early phases of retirement asset accumulation, balance the need for appreciation with the need for income as retirement approaches, and focus more on income and principal stability during retirement. The funds maintain a substantial allocation to equities both prior to and after the target date, which can result in greater volatility.
